

Customer Churn & Retention Analysis Report

This report presents an analysis of customer churn behavior using the Telco Customer Churn dataset.

Objective: Identify churn patterns, retention drivers, and provide actionable insights.

Tools Used: Power BI, Excel, DAX

Key Metrics: Total Customers, Churn Rate, Revenue, Average Tenure

Key Insights:

- Customers with month-to-month contracts show higher churn
- New customers (low tenure) are more likely to churn
- Electronic payment methods have higher churn rates
- Lack of tech support increases churn probability

Business Recommendations:

- Promote long-term contracts with incentives
- Improve onboarding experience
- Encourage automatic payments
- Provide better customer support services

Conclusion:

The analysis highlights critical factors influencing churn and provides data-driven strategies to improve customer retention.
